

USE OF HAZ-TAB GRANULES

BEFORE YOU START

Always wear protective gloves & an apron.

(Use eye protection if required)

Where possible ensure good ventilation when using all chlorine products.

Refer to COSHH data on product label.

Check product expiry date.

MSDS sheets are available via www.guestmedical.com

Store HAZ-TAB Granules in a secure location away from public areas.

FOR BLOOD & BLOOD-STAINED BODY FLUID SPILLS

Sprinkle HAZ-TAB Granules over spill until all moisture is completely absorbed.

Leave for 2 minutes.

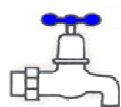

Collect Granules and spill mixture using disposable paper towels. Make sure the area/surface is left clean and dry to avoid accidents.

Discard all in a clinical waste bag.

FOR BLOOD SPLASHES & DRIPS ON WALLS, ETC.

Wet a disposable paper towel, gently squeeze out excess water and lightly sprinkle the HAZ-TAB granules over it.

When the granules have dissolved. Use the towels to wipe area and remove drips or splashes on vertical surfaces.

Place all used materials, gloves last, in an orange clinical waste disposal bag.

NOW WASH YOUR HANDS!

FINALLY

Thoroughly clean the area of the spill with general purpose detergent and water.

IMPORTANT POINTS

1. Never use on chemical spills or mix with any other cleaning chemicals.
2. The granules are not recommended for use on fabrics or carpets.
3. For non blood-stained body fluids, see the Decontamination Policy.
4. If in doubt about the use of this product, contact your Infection Control Advisor.
